Related Experience

Full-Stack Software Engineer, Rocksbox, Present
- Work on a small team of developers to support existing software and to develop new features in a fast-growing jewelry rental/subscription company.
- Example projects: Overhaul of wish list experience, redesign of stylist curation tool to include data-driven recommendations, and marketing campaigns to promote various designers and to increase subscription conversion on incoming traffic.

Web Developer in Training, General Assembly, 2015-2016
- Completed a 12-week immersive program in front-end and back-end web development where I created full-stack applications using a variety of languages and frameworks.
- Collaborated with teams of developers to create full-stack applications.

Projects

Word Wizzərd   [wordwizzerd.com] | [github.com/stevendnoble/wordwizzerd]
- A collection of word games using passages from classic literature.
- Tech Stack: MongoDB, ExpressJS, AngularJS, NodeJS

PokéMath   [poke-math.com] | [github.com/stevendnoble/pokemath]
- A browser game for math education. I developed the game logic and styled the views.
- Tech Stack: Rails, PostgreSQL, Rspec, JavaScript, jQuery

PulseCheck Polling   [pulsecheckpolling.com] | [github.com/stevendnoble/pulse-check]
- A polling application for teachers to check student understanding and increase engagement.
- Tech Stack: MongoDB, ExpressJS, NodeJS, Mocha/Chai, jQuery

Work Experience

High School Math and Special Education Teacher, 2005-2015
- Adapted curriculum to students with varied skill levels.
- Organized regional and state Academic Decathlon competitions for teams across the state.
